Possible Conflict in Document Centers

1. You are aware of the former Air Document Center formally under T-2 at Wright Field.
2. This was taken out from under the jurisdiction of T-2 and made a joint Air Force-Navy operation at Wright Field.
3. I learned recently that the Army has or is just about to join in this venture, thus setting up in effect a Unified Service Document Center at Wright Field. I believe the plans for this center include an expansion beyond its original air concept.
4. Query whether this conflicts with the Foreign Documents Branch of our Office of Operations, and whether any coordination of this project with CIA was entered into prior to the establishment of the final combined center.
